

# What does PARTNERSHIP look like between a health system & its community?

Bidirectionality

working together, collaboration

Collaboration, Connection, Shared Goals, Shared Vision

Providing education . Solicit feedback for community needs.. bringing services to communities.

Willingness to understand the need of the community.

Equity

Limited

Active participants

Bridging gaps

# What does PARTNERSHIP look like between a health system & its community?

Understanding strengths and assets, not just needs or weaknesses

Listening to the needs of the community and working collaboratively.

Consistency

Open

Seamless transition of care and working together to achieve our shared outcomes goals

Being present where the community needs care and services. Having ongoing conversations to understand needs and identifying the ROSE, THORN and BUDs

Building

Making and following a shared vision.  
Coordinating plans to best suit the patients

good communication

# What is a strategy or tactic you want to use to improve your community relationships?

focus groups from the community

Identify missing partners and reach out personally

Listening but also constantly communicating across cultures

Take a step back from focus on COVID to what the community now needs as new dynamics are coming to light post-COVID.

Learn to truly listen

Invite a broad range of folks to the table
